

OCTOBER MAYOR'S MESSAGE

September brought lots of progress to Surf City. I am pleased with the progress and excited to watch as we close the door on some long-standing projects. Along with Council, I had the privilege to leave my handprints in the foundation of our new town hall. Steady and daily progress is happening with this construction as history is being made. As I watch each wall go up, I feel grateful for such a great community that pulls together with such resiliency, and I also feel relieved to see our hopes come to fruition. As I watch this construction and see the literal rebuilding taking place, I reflect on where we have been and what we have gone through to get to where we are today. Storms may come but we are stronger than ever, and we are all joined in the pride and love we have for our beautiful community. I think it is important that in each decision we make that community come first. I continue my commitment to making that happen. I look forward to a successful October!
